Experience

Full Stack Developer Intern, *Fulcrum Resources Infinity Pvt. Ltd. Pune, January 2024 |Present.*

Project Work – Working on Job Portal Website using react. As a frontend developer work for a comprehensive job portal website, I am responsible for designing and implementing the user-facing components and interactive features of the platform.

Developed the job search and filtering functionality using React.js, enabling users to easily find relevant job listings based on criteria such as job title, location, salary range, and more.

Implemented a secure user registration and profile management system, allowing job seekers to create accounts, upload resumes, and track the status of their job applications.

Collaborated closely with the backend team to ensure seamless integration and data exchange between the frontend and the API.

Full Stack Developer Intern, *SevenMentor & Training Pvt. Ltd. Pune, August 2023 | January 2023.*

Project Work – Developed E-commerce website in react, as a full stack developer, I designed and implemented the front-end user interface using React.js, ensuring a responsive and intuitive shopping experience across devices. Developed the back-end API using Node.js and Express, handling product management, order processing, and customer data management. Integrated shopping cart functionality. Implemented real-time order updates.

Jr. Software Developer Intern, *Angel Infotech Aurangabad, February 2022 | February 2023.*

Project Work – I worked on the Agnikawach project. This is informative resource Website and I was involved in developing front end part. The Agni Kawach website is a well-designed and informative resource for information about fire safety. The website is easy to use and provides a wealth of information about the company's products and services.
